Canada Dec. 21 1873

Dear Brightman.

At length the Mistletoe collection is distributed into sets, & most tedious long job it has been sorting up minutes of my most valuable time. Shall I send your set, & whatever else there is for you on by "Express" I shall put up in a box, I don't know how many in your set yet. They are £2. for two abroad; here we are forced, for Mistletoe raises only to $15 pr. doz in greenbacks.

I have been too-hard worked all day and too tired at night to write any more than I could just help. So your letter of Dec. 4. has laid unanswered so long. Well, never mind Schweinfurth

I am staying again with Asa.
Thanks for the Bulmea Lobb=
Iguana — pues, etc. —
Brewer is here & sends you
this memo's I have Parry's
Stragulii & little mine
thus near all, beyond the Sierra
Nhar — which you must
deal with.

As to your unpublished plates
I rather wish one of them
days have a better mind
about it. But you must
not expect me to look at
occasion-notes as any
thing else than curious.

When I open the bundle
of Mandrin's plants to assort
for sharing, I will perhaps
find you duplicate but you
can keep all but
a specimen of the sets for me
meanwhile keep what you have,

Ever Yours

A. Gray

Ans Jan 26

21 June 1865

Dear C.

I have your 2 letters
We sent you as good as there
was of the Costa Cubitricha, &
ask are now distributed. When
we can open my packages I
will pick out some of it for
my specimen.

You will find full materials
of the Costa Rica in the parcel.

I wrote at once to Torrey, for his
Bulletin chus _ not sent yet.

Get from some merchant in St.
Louis explicit directions how I
should send the box to you - as
freight - when deliver it in Boston &c

I have just pushed out a
Browera 2 Cubitricha for you.

In haste. Gray

Major Swaggin
in California.

Rec'd Feby 10th

Camden 4th Feb. 1861.

Dear Engelmann.

Torrey's Bulletin

Came this evening, and
now I can send the box
to you as soon as you
will give me directions
how to address, by what
route & cheap to send — which
any of your business friends
- dealing with Boston can tell
you about

Lewis' Life of Bitter = published
here by Lickwar & Field. is
wholly out of print. I have had
an order sent for it several
weeks. — no return.

They say it will be reprinted
one of these days. I must
wait till then.

No news. I did not go — nor
did many go. to that Washington

meeting. — The clique had
full strength, and so did not
do simple justice to themselves
by electing Bond — whose name
is very "auspicuous for its ab=
sence!" — their last chance —
for Bond will die before ours is
even here.

Wyman has resigned, &
I ~~want~~ want to do so; —
perhaps shall soon — at present
I defer to one or two friends
who think I ought not.

Ever Yours truly

A. Gray

Rec'd 22 Febr
Answ. March 12.

Callicoe. 14th Feb. 1865

My Dear Engelmann.

Did I write you that Lewis Life of Gitter is quite out of print, and that our copy has just turned up in response to my order?

The Case - containing b. Wrights Cuba coll. Torrey's Callicoe, & the things accumulated in your prison-table here - went on Tuesday - addressed as you directed, by Express-man delivered to the Boston Agents, Messrs Potter, & T. Washington St. He has not yet brought back any receipt, I trust he has one - and that the case will safely & soon reach you.

"57th Year" Well, you are only 2 years ahead of me - not so much as I thought.

I don't at all know what you

you refer to — about the 2 Callitriche
verna & marginata. i.e. have no
recollection about them — suppose I
had given habitat with the specimens
Can't remember anything more.

For my only can tell you about
that paper of Arnott's — in
your Scotch Journal that
never surprised — which I have
not. I take it will answer your
purpose by; if not punch him up;
it is the only way.

"Cocoas and your Night" does
seem to know nothing about it. —
Some and be picked up, in Cuba —
I believe — that you might grow it,
I advise you to throw it away.

Night is here — distributing and
finishing up his N. Pacific Exped.
collection — has now been in the
3 h hours, with cold & fever. I
hope to be all right in a day or
two more, Will return to Cuba in
a month or two — to take a year
or two more there; revisit some St
Ports and explore some more; then
visit Europe. but Night sees rather bothered.

Rothrock — from N. W. Pennsylvania — is a bright lively — natural fellow — pupil of mine for last 2 or 3 years, when not serving his country in the army — where he has done good service as private in infantry, and as Capt. in Penn. Cavalry, etc. He had to leave his Botany unfinished, and you may see by the neat finish of it, that my hand has been put to it somewhat, & let the real credit of all belongs to him. His father is M. D. — & he is now studying medicine — attending lectures at Philada — but Botany is in him, and will probably come out. Address

Jos. Trimble Rothrock.
McVeytown. Mifflin Co.
Penn.

A note from you would please him,

Very many thanks to you for your
promise to try and get rid of that
C. Australe.
must be represented by something
and I hope by this.
Yes. Champsdina a right of
course to have been put down.
We will do it in future.
Well, so I have blundered about
Pinsteenan tubiflora. I hope you
will some day get it again. Mr. & Mrs. Child
& Orr. are too poor in it to help
one much.
"Sisyrinchium alliodora. Rol."
Good. Glad of some one to put it
on. But stupid I not mark it as
a var. of Bermudiana.
Sisyrinchium: derivation.
Linn. Phil. Bot, just as I have
given it.

Bea Feb 22 1865

Calabar Beans: Thurber has loaned me a No. of Seeman's Journal of Botany, which has an article on it. If I do not find something about it, please repeat the question in your next.

Grass for brushes, don't know, but I imagine Lygeum spartum

Bag-sheath of leaves of the Manicaria saccifera, Gaertn., of the Isthmus of Panama. Thurber gave me one.

Then - I believe this is about all. Lovell has made a nice present of costly botanical books - of which more anon.

Ever Yours

Rec'd March 24th

Cambridge. March 18th, 1885

Dear E. I add a hasty slip, in reply to yours of March 12 — I am glad you have the list all safe.

As to Knights Cuba plants, I have the names of 2/3 already — rather the provisional names, and Hemsley is beginning to report the rest. — He shall soon have the whole in a full list Cat. of known plants of Cuba. — to which if published here, I mean to add a list of Knights nos. & execute duly, with the names attached — which will be a great convenience to you.

The price, you know, — at Cates's instigation was fixed in Mex. at $15. pr. 100 in Gum sacks — much lower than the old $10. for the Kew year. — and still lower, — for Gold can't stay as low as $1.50. Yet a while. Abroad the price is £2. the 100. — which pays better.

I will try to give you an account — account.

Well, I thought that copy of Christ. Fl. Brit. W. Ind. was for you. But, with Knights aid, I now understand it. I must import parts 1-5 for you. If exchange stays as low as now, & the price it will be yet lower, the cost will not be very high to you, when it comes. I write to the Smithsonian

0 1 2 3 4 5 6 7 8 9 10
cm
copyright reserved
MISSOURI BOTANICAL GARDEN

for it to-night.

As to the Mexican things of Greene, excepting one or 2 Compositæ, I did not touch them — was afraid to look them over, for fear of damaging them &c —

There! I have sent for it. Thurber has not yet returned my copy of Seemann's Journal about the "Phytostigma venosum". Refer to the thing by a card in your next, and I shall be able to reply.

I have not yet found any reference to Rupr's Picea montana. Give me that & I may look it up. I have a good part of Rupr's publications, & may be the "P. Canadensis, var. pumila, Pallas" which Rupr cites in Fl. Sibiranica & Fl. Ussuriensis, &c —

Funny this variation of that Pollen in Abietineæ!

Remember in May the request for pollen &c — of Abies Canadensis, & I will send you any quantity.

I will try to remember to look at pollen of Larch & Hemlock to-day. — No fit student now.

Sutherland is going with Kennicott, this week to N. W. America, Smith's friend & S. to explore on telegraph route close along the arctic circle. Any pains there for me?

You have all rights noticed in Callichroa, Pines &c—

Thanks, deep & many, for your wishing me at that Callichroa Analogy!!

If I ever get Olivia Maitland you shall have it. Thus far I have only single specimens. Olivia Lee got it at Salina, N.Y. & Bourgeau at Sarkatchawan. Lindley's books, asks for duplicates of Lindley what I had not got have gone only what I had not got have already.

Elliott to be hanged soon. I heard of it lately, will ask

Agassiz is going to Brazil — on a great Voyage. I hear. I must consider more about Agassiz. May not put him through college first — the very

last thing, especially such a college as this, and then to study medicine: time enough.

We have really — thanks to Agassiz & Peirce & their starting all good plans — our Scientific School at Cambridge. (They have one at Yale), but here are separate schools: in one they teach Chemistry, Mineralogy, in one, Engineering. — in another there are lectures on Zoology & Geology — if one use to a young beginner, & very little to an older hand. But our education — our examination for general & elementary text, History instruction: though there is a fine field open here, & students would pour in, if there was any system.

I mail you a Catalogue.

Ever Yours A Gray

Reed's May 20
Rec'd June 5

Dear Engelmann.

Yesterday came yours of May 10th, which having exchange for $ 250 in it (for which) must be acknowledged at once.

Your former ones, of April 6. & April 19. came the same day, one of them having tarried a while at Cambridge, Maryland!

I am beyond all measure busy at this season, — to distraction and can't get attack such miserable letters as yours before me. — I must have daylight for it.

$ 257, even in greenbacks, is a big sum; but you owed me out. I think, if you wish. Anderson (Stockholm botanist) and Fries (also botanist) wanted to subscribe for a set. None at all just is left for them. They are sold abroad for

0 1 2 3 4 5 6 7 8 9 10
cm
copyright reserved
MISSOURI BOTANICAL GARDEN

£2. than ever. — a hundred less than $15 now. — but at the time they were discounted the price then ($15) was 1/4 lower than the £2. about. Write to Anderson, if you like and Abe, letting me know. If not, I will Abe him such a set as we have left. Part now the war is over, & Missouri a free State with a splendid career for St. Louis, you are to be more prosperous than ever — as I told you you would be.

Austin, — a sort of steward lecturer on Chemistry &c. age about 35: — talent enough, — but a mighty handy fellow. Manners passably not very pleasing

I will look at Brown & Robinson. for fruit for you, as soon as I can.

What shall you ? I have written again to Hooker, to know if he is tired of the ~~austr~~ in inner mind like, and what he would come here for. If he would like to come, & take charge of the Gardens as well as the Botanic. I could possibly get the salary a pay half his salary, & I the other half. But I don't see how we may clearly get it. But I cannot lead this sort of life much longer.

Salatan Brain. There is a paper in Hookers Journal of Botany. 1. p. 239 (Aug. 1849)

It appears that Physostigma venenosum is a Phaseolea (Leguminosae) named by Balfour in Trans. Roy. Soc. Edinburgh. 22. p. 305. - 2 plates - & - (Tropical E. ~~Afr~~ Africa)

(Bolivia)
Mandon Plants, Sent are not to be returned.

Thanks. You should write a brief critical notice of DeCandolle work for Sill. Journal. I had an idea he was so careless. He has the Pacif. R. R. volumes ~~complete~~ complete!

That is all for to-night. I hope to look at the Cornus &c in a day or two.

Yours

A. Gray

Dear Engelmann

Here is something!

Two very intelligent young ladies tell me that the Magnolia in Illinois, near Chicago, is not fragrant.

This reminds that Buttalla says in Geo. Pl. that St. alba grows near Detroit! — which I did not believe — But it may be so. How is your Magnolia? odorous?

By the way I remember Buttalla says St. alba of Europe is fragrant and is not distinct from St. odorata.

What say you.

I have placed Fendler
for 5 or 6 a furnished room,
with some chance for some
pay after a year or so. If
we can get help in the funds
for it. I want some
night smart fellow, up to
Horticulture & Botany. I fear
Fendler won't come, and I
also fear he is too old.

I did not (amid bustle) get your notes on Deb. Post. Leaves till after my little notice was printed. Pray touch it up for Silliman.

I never told you anything about "Sufficient a Lubbum, Drum" Sprecher with some print list of

all Cuba plants.

I believe we have lost Steinheim Americana out of Garden.

I will send flowers from Auburn.

Torrey is in California & there will be none in the autumn.

Yours of 17th inst.

Schultz. is indeed, a good deal of a swell.

I know nothing of purple-th. Sagittaria altifolia.

Send Callitriche only when ripe and safe opportunity turns up.

Two weeks pass with me essentially finish up my Algae work. But I can't leave Cambridge till 24th July — and then only for 3 weeks. And then I can set to work again. It is hard that I get so little time.

I am very sorry you are such
a bitter Opposhead,
Those who have appealed
to arms, and fought desperately
to the last must take the in-
evitable Consequences, You
ought to rejoice at the destruc-
tion of Slavery, and the renova-
tion of your State.

known to you that I have
revised Lithospermum with 2
n. sp. — one of which has
been mixed up with L.
hetemophyllum.

Your Blennosperma =
Orijelus in Wheppl. in which
Torrey had (in my spec.) noticed
the connate — cupulate involu=
lucre = Douglas' specimens
also — tho' them the scales
are not so much connate.
They are equally connate in
the Chilian B. Chilensis
Around the gen. Char. that's
all,

The Pentachaeta, if distinct
is the same as Bigelow's from
Corte Madera. Scales rather
broader & less intricated than
in Mt. Diablo &c. — But I suppose
they run into one another. I
shall, on my return, see if
Mrs. collection throws any
light on it. I should still
like Bolander to say if the rays
are white.

Thanks for Specularia perfo-
liata Benth.

From "Steinheuera hispidula"
is only Americana. I send
you a dried leaf of H. hispidula.
Hut Canal. from Mts. Virginia.

the least thoroughness, or clearness.
But I have accumulated materials
in it with all diligence, — have a great
amount of it. And some bits from
Prince Rupert.

Bebb, of Washington, has worked at
the rubus group, & has made out
— he thinks (probably right) 4 kinds.
I. frondosus as a common species.
I can send fine specimens & sketches
from here.

Now I think I should send you, at
once all my Tenci — freeze or
kill. You can't do well without them.
But I want for you to say if I shall
send fresher, at least Cusp. & Striatine
now also. Let me know (by
a telegram, if you are in a hurry) &
I will fix up the whole concern for
you & send by express.

Brewer — who leaves me to-morrow —
tells me his Tenci are at Northampton
But a full set shall be selected
for you when he gets there — say
middle of Sept. —

I may send you a charming letter from
California & Nevada — is very well,
very active, & having a nice time.
will be home soon & see you & Jim

ans same day. & Octob 6th

Canandaigua Sept. 11, 1851—

Dear Engelmann

Look out for Water-Lily fruits, of all sorts.

That little Water-Lily, I sent you — which is N. minor DC. — ~~also the large one~~ and is fragrant — flowered — also the large-leaved & large-flowered inhabs of Lake Ontario — with veins of leaves very prominent & rhizomata tuberiferous (call. by Paine) has no arillus at all — only a little ring invisible to naked eye.

In fishing out Nymphaea fruits from deep pond (flowers over past) I got one pod with seminibus minoribus reticulatis arillo brevissimo cupuliformi suffultis.

Nothing like this known. Curiously DC. in Syst (2. p. 17) describes the seed of N. alba so — only arillus not so small: But not so had by Schkuhr, or Richardson. I have

our print of St. alba. Have you any seed for me? I incline to look into this matter of our Symphoricarpos myself. — Have discarded this char. of the axillars. My correspondents in Illinois — Michigan, &c — for fruits, I have sent seed of the St. balsamifera!!! to Caspary. Soak them, & bring up the axillars. — Perhaps it is not the axillars, but?

Trelease is here — at work well — only he works too steadily. He is a great comfort to me. I am so much distracted by various things — that — as far as Botany goes I might as well be practicing medicine — as you are.

I have all your letters — up to that of Oct. 4. I have never got La Harpe? —

Adams Express Company,

GREAT EASTERN, WESTERN AND SOUTHERN

EXPRESS FORWARDERS.

No. 1.

BOSTON, Sept 19 1865

RECEIVED OF

Dr

Value U. S. C.

Marked Dr. G. Engelmann.

St Louis Mo.

Which it is mutually agreed is to be forwarded to our Agency nearest or most convenient to destination only, and there delivered to other parties to complete the transportation.

It is part of the consideration of this contract, and it is agreed, that the said Express Company ARE FORWARDERS ONLY, and are not to be held liable or responsible for any loss or damage to said property while being conveyed by the CARRIERS to whom the same may be by said Express Company entrusted, or arising from the dangers of Railroads, Ocean or River Navigation, Steam, Fire in Stores, Depots, or in Transit, Leakage, Breakage, or from any cause whatever, unless, in every case, the same be proved to have occurred from the fraud or gross negligence of said Express Company, or their servants; nor in any event shall the holder hereof demand beyond the sum of FIFTY DOLLARS, at which the article forwarded is hereby valued, unless otherwise herein expressed, or *unless specially insured by them, and so specified in this receipt*, which insurance shall constitute the limit of the liability of the Adams Express Company. *And if the same is entrusted or delivered to any other Express Company, or Agent, (which said Adams Express Company are hereby authorized to do,) such Company or person so selected shall be regarded exclusively as the agent of the shipper or owner, and, as such, alone liable, and the Adams Express Company shall not be in any event responsible for the negligence or non-performance of any such Company or person*; nor in any event shall said Express Company be liable for any loss or damage unless the claim therefor shall be presented to them, in writing, at this office, within thirty days after this date, in a statement to which this receipt shall be annexed. All articles of GLASS, or *contained in Glass*, or *any of a fragile nature*, will be taken at *Shipper's risk only*, and the Shipper agrees that the Company shall not be held responsible for any injury, by breakage or otherwise, nor for damage to goods not properly packed and secured for transportation. It is further agreed that said Company shall not in any event be liable for any loss, damage or detention caused by the acts of God, Civil or Military authority, or by Rebellion, Piracy, Insurrection, or Riot, or the dangers incident to a time of war.

For the Company,

FREIGHT, _____

INSURED by ADAMS EXPRESS COMPANY,

My Dear Engelmann:

Now for a word or two with you.

I have credited your account with $60, given by you to Sanders, and enclose I send you a draft for $50 (fifty dollars) as you desired — which I have charged.

Your letter of Sept. 28, announcing the safe arrival of the box — stamped "Academy of Science, St. Louis." came 3 days ago. long after that of Oct. 6.

I sent you not only

I sent all of Meyer an Enumeration which I have; Mr. Parker is better — well, but weak, and has had the Directorship offered to him, with same salary as his Father had.

Dr. La Harpe. Well. I believe the Act. Nat. Hist. Soc. Par. is in the Library of the Lyceum Nat. Hist. Institute — and so I fear boxed up. Perhaps I can ascertain. You must get extracts made

0 1 2 3 4 5 6 7 8 9 10

MISSOURI BOTANICAL GARDEN

from it in Paris or Berlin — unless I can find it — which is doubtful

---

I didn't answer 1/4 of your queries! Well, I answer all I can.

The fact is as to how I identified Juncus paradoxus, I do not know at all. Not the least remembrance, & no data — unless you find some in Engelm.

The fact is I could make nothing out of our Junci at the time — and less since. I have had all material I got — and you have them, & must make the most of them,

It is the very — very difficulty — to identify what the name of older species apply to.

How can I help you about J. debilis. Only what was first described was slender

I am very much crowded — having to lecture 3 times a week, and lots of various administrative work,

Ever yours
Asa Gray

Rec: Nov 15

Cambridge Nov. 10, 1858.

Dear E,

The enclosed came from Anderson to-day. Sendler has copied what you asked for — here in. Sends his respects! —

My birth-day comes on the 18th inst. (55!)

I told Paine to write tuberosa instead of tuberifera.

"Solanum tuberosum Linn"

Has Watkins yet sent you Juncus militaris with the capillary submersed leaves, very pretty?

"Juncus militaris, Bayonet Rush. — — — — — —

Discovered by Mr. Greene, growing plentifully in a pond at Tewksbury."

Bigel. Fl. Bost. ed. 2. (1824) p. 139.

There is an old letter of Jones, "Scituate" — much about

Fraxinus — & parts, &c —
also Fraxetina — I must only
halt it now — Sutton was
now I came to touch them just
now.

I have a letter from
Parlatore — I am put in
condition to help him — except
that — the myth Canby —
will get him cones of Pinus
australis & Taeda, and some
male flowers next year.
Here is his letter. Return it,
with note. — as I shall reply

Ever Yours

A Gray

Dec. 11.

Yours of 6th came yesterday. And Henslow has copied your paper.

The Juncus megacephalus. & Cuntes. You sh. have found in J. echinatus. Cl., & the known only from the Bucket Island plant.

Look in your copy of Torrend. Illus. Fl. vol. 1 for Juckman. Lichen — and in later vols. for more. J. is rare at such an altitude

Prof. E. Smith of Philadelphia is President of the Reading R. Road, and a sharp botanist. Has Cuscuta in Mights Lotus also.

I shall have the new part N. Gen. Pl. for you in a few days.

The small parcel from Andersson has come. I think I have a nice oil-copy of portrait of Linnaeus painted by Madame Andersson.

I have sent around to Linden for what you want of Grizzly Adams Ht. Mo. 2nd.

Chapman is here - excellent boyish man all through. - hates copperhead - is some grizzly back. for that you can write him at Appalachicola for Grizzly. I have told him what you are at with the bears.

Yes, I hear from Jimmy now & then; expect him here at Xmas or New Year.

I believe Jenkins thinks he must get back to his battery in the spring, and I am sorry for it,

I pay him 50 dollars a month, with found room & fuel, & ~~paid~~ pair his fare from St Louis. A.G.

Alex Dec 15 1865
Ann Dec 25 Amenia. no. 22.

Extract from Fl. Tasm. ii 2. p. 64
" Brit. Beechey. p. 402.

Anderssons things have not yet been yet — by a long shot — are coming by way of Lubeck & Hamburgh. I think it likely Parkat's letter to you has miscarried — not rightly addressed. Next year you shall have Symphoricarpus enough; but then alone now.

Torrey, I have not seen. Says he is well. I hope he will come here Xmas.

"J. Hookeri var. β. megacephalus" Torr. Fl. N. Y. State 2. p. 446 — founded on my Shore of Lake Ontario plant — which I confused with J. echinatus Ell —

Dr. Robbins was here last week, says he has sent you (as I desired) specimen of J. militaris with the submersed leaves.

Lindley is dead — 66.
apoplexy. Nov. 1.

Dear C.

Syn. Pl. Ut. 2. is now here. Also a new part of Lindl. Fluv. Lucy

Shall I send, with the few plants in your frigerable, & the compact parcel (N Lapland plants) from Anderson? Or keep for the present?

The new Syn. Pl. Ut. 2. is cut short at the end of Myrtaceae.

Fendler says his letter is very lonely & cannot get on without him, and he must go back again March 1. — I am sorry for it.

Ever yours

A. Gray

Cambridge. Dec. 31. — Last hours of 1865.

Dear E, Yours of Christmas Day came yesterday.

I write these scraps as the mood is: but this morning, I have no intention of slighting any of your queries or suggestions. When I have omitted it was inadvertance — or nothing to say.

Dr. Peabody lives at Mt. Auburn. When last here I thought he told me he had written to you. He will soon be here again: — is a worthy old person: But few are so prompt in correspondence as you & I. There is Farrar — to whom I have written & sent valuable papers — these not written me for 6 weeks.

You had better write to Chapman. Probably, like myself, he may like you well as a man and a botanist, and may not know you as a correspondent,

The Sarothra was brought by one of the college boys from somewhere in this part of the State. — That is all I can say now, I think.

Mr Durand is sending specimens (I have one) of "Sarothra luteum" — from about Philadelphia — collected by Mr Collins, ~~Esq~~ — Mr Durand is to look it up.

Now "Linum filipendulum" Nuttl. to be sent? — Well, avoid it if possible, as a "common falsum" — Call it Nuttleyi say?!

I have credited you the $18.—
Notice for Jany. printing & Stat.
Acad. has come in. I know
nothing — remain wilfully ignorant.
Perhaps they have dropped you. —
I shall not go near them — but they
may drop me. Happy New Year to
you.
Ever
